

TS™ 102-2 Conductive Tank Seal Material

LAMINATED PTFE MATERIALS ENGINEERED FOR TANK SEALING SERVICE

TS™ 102-2 Conductive Tank Seal Material:

TS 102-2 Conductive is engineered for both wet and dry service in above ground storage tanks. PTFE films, 0.002" (0.05 mm) thick, are laminated to both sides of a high strength fiberglass textile containing a uniform, penetrating, PTFE coating. This nonporous laminate is capable of withstanding severe stresses in challenging environmental conditions.

0.002" (0.05 mm) PTFE Film

PTFE Coated Fiberglass

(Red films have been used in the photo to more clearly display the laminate components.)

- Successfully used in tank sealing service since 1987
- Severe chemical and temperature exposure capabilities
- Nonporous
- Product variations, including special widths, available upon request
- Easily heat-sealed in field service

TS™ 102-2 CONDUCTIVE PROPERTIES

Upper Use Temperature:	600°F (316°C) Continuous Service
Weight:	14.0 oz/yd ² (476 g/m ²)
Thickness:	0.010" (0.25 mm)
Width:	60" (1524 mm) Typical
Tensile Strength (Warp):	250 lbs/in (2189 N/50 mm)
Tensile Strength (Fill):	200 lbs/in (1751 N/50 mm)
Surface Resistivity:	< 300,000 ohms/sq
